# Local and Miscellaneous.

ELICOTTVILLE, FRIDAY, JULY 24, 1863.

**RETURNED.**—Col. P. H. Jones of the 154th Regiment, returned to Washington on Monday last.

**GOING.**—Frank Stebbins of the Cuba Patriot has drawn a prize—he's drafted to go to Dixie. Also Em. Pierce, formerly of this county, got a prize in the same lottery.

**DEDRICK CONVICTED.**—We learn that Peter B. Deldrick was tried last week at Angelica, on an indictment for forgery, (forging a Note for \$300,000 against Judge Chamberlain,) and found guilty. Sentenced to Auburn for five years. At last, Peter has got his deserts.

**ATLANTIC HOUSE, SALAMANCA.**—Mr. A. B. Rick keeps a good Tavern at Salamanca, and those who have occasion to stop there will find a good table and good-keeping for horses. See card in another column.

**DROWNED.**—We regret to learn that a son of Mr. E. C. Elliot, of Waverly, aged about nine years, was drowned in the Mill pond at that place, on Saturday night last. His body was not recovered until Sunday morning.

**ARTICLE FOR AUGUST.**—This excellent Monthly for August, is on our table, filled, as usual, with choice reading. Price \$2, per annum. T. S. Arthur & Co., Philadelphia.

**GODEY FOR AUGUST.**—This popular and elegant Magazine for the coming month of August, fairly surpasses itself. The Engravings and the colored Fashion plate are really superb, worth the subscription price for a year. Send and get one for the ladies. Price \$3 per annum. Address L. A. Golley, Philadelphia, Pa.

**FUNERAL OF CAPT. FULTON.**—The funeral of this gallant young officer, who was killed at Gettysburgh, took place at Little Valley on Saturday last.

Col. Rick, Col. Jones and most of the returned Soldiers attended the funeral in a body. The attendance was large, and the melancholy task of committing the remains of their deceased friend and comrade to his last resting place was a sad and mournful one. Peace to the brave soldier's ashes.

**RAIN.**—We had a big rain on Monday night last, large enough to make a flood, doing considerable damage to fences, grass and corn

# SPECIAL NOTICES.

## TRIUMPHANT SUCCESS!

**HAMILTON'S PATENT AND ATMOSPHERIC CHURN DASH:** The most important, valuable and economical invention of the age!

It is well known to Dairymen and others that Butter is contained in minute sacks or globules, and requires the action of air to prepare the covering or membrane to be removed by friction.

*The Scientific American says:*

"If cream is dashed against hard substances or mashed between bars or rollers, it breaks the globules, and becomes oily by destroying the grain.— It should be thrown into currents and counter-currents by the action of air, causing a friction, by the currents against each other, removing the covering without breaking or bursting the globules."

The inventor of this Dash endeavored to keep this theory in view, and hence the remunerative results. We can churn new milk or cream in from three to ten minutes, producing a larger quantity, and a superior quality, to that made in, or by any other method. One grand feature of this Dash is; that it can be introduced into any kind of churn, thereby saving additional expense in buying another.

The result is as certain as that grass grows and Butter is made. Wherever it has been exhibited, at Agricultural Fairs, it has taken the first premium.

For sale by PETER H. MARTIN,  
Irvine Hall, Ellicottville.  
N. B. Counties and Territorial rights for sale.

## Craig's Microscope

Is the simplest, most beautiful, interesting and useful Instrument ever made.

It MAGNIFIES ONE HUNDRED DIAMETERS, OR 10,000 Times!

Viewed in this Microscope, a common *cheesewheel* assumes gigantic proportions; animalcules in stagnant water are distinctly visible; the curious construction of insects, in their various parts, is intimately observable; all granular substances, such as flour, coffee, &c., can be tested, and adulteration therein detected. As a means of education and amusement, it is invaluable. It is the first successful attempt to cheapen and popularize the microscope. Every lover of nature, student, scientific and business man should own one. Its price, Two Dollars, places it within every one's reach. All the Dealers and Agents who have undertaken its sale have prepared Testimonials, description &c. in ILLUSTRATED CIRCULARS are sent, free on application.

DEALERS SHOULD SEND FOR EXTRA PRIVATE CIRCULAR TO THE TRADE.

Price, free by mail \$2.25; with six mounted objects \$3; with 24 objects \$5. Objects mounted for the microscope, \$1.50 per dozen.

Dealers should order from GEO. BOWEN & CO. P. O. Box 4555, 491 Broadway, New York City.

Retail orders from the neighborhood of Ellicottville will be attended by E. S. STEWART.
