# Local and Miscellaneous.

ELICOTTVILLE, FRIDAY, JULY 24, 1863.

**RETURNED.**—Col. P. H. Jones of the  
154th Regiment, returned to Washington on  
Monday last.

**GOING.**—Frank Stebbins of the Cuba  
Patriot has drawn a prize—he's drafted to go  
to Dixie. Also Em. Pierce, formerly of this  
county, got a prize in the same lottery.

**DEDRICK CONVICTED.**—We learn that  
Peter B. Deldrick was tried last week at An-  
gelica, on an indictment for forgery, (forging a  
Note for \$300,000 against Judge Chamberlain.)  
and found guilty. Sentenced to Auburn for  
five years. At last, Peter has got his deserts.

**ATLANTIC HOUSE, SALAMANCA.**—Mr. A.  
B. Rick keeps a good Tavern at Salamanca,  
and those who have occasion to stop there will  
find a good table and good-keeping for horses.  
See card in another column.

**DROWNED.**—We regret to learn that a  
son of Mr. E. C. ELLIOT, of Waverly, aged  
about nine years, was drowned in the Mill pond  
at that place, on Saturday night last. His  
body was not recovered until Sunday morning.

**ARTICLE FOR AUGUST.**—This excellent  
Monthly for August, is on our table, filled, as  
usual, with choice reading. Price \$2, per an-  
num. T. S. Arthur & Co., Philadelphia.

**GODEY FOR AUGUST.**—This popular and  
elegant Magazine for the coming month of Au-  
gust, fairly surpasses itself. The Engravings  
and the colored Fashion plate are really superb,  
worth the subscription price for a year. Send  
and get one for the ladies. Price \$3 per an-  
num. Address L. A. Godey, Philadelphia, Pa.

**FUNERAL OF CAPT. FULTON.**—The fu-  
neral of this gallant young officer, who was  
killed at Gettysburgh, took place at Little Val-  
ley on Saturday last.

Col. Rick, Col. Jones and most of the return-  
ed Soldiers attended the funeral in a body.—  
The attendance was large, and the melancholy  
task of committing the remains of their deceas-  
ed friend and comrade to his last resting place  
was a sad and mournful one.

Peace to the brave soldier's ashes.

**RAIN.**—We had a big rain on Monday  
night last, large enough to make a flood, doing  
considerable damage to fences, grass and corn

# SPECIAL NOTICES.

## TRIUMPHANT SUCCESS!

HAMILTON'S PATENT AND ATMOSPHERIC CHURN  
DASH: The most important, valuable and econom-  
ical invention of the age!

It is well known to Dairymen and others that  
Butter is contained in minute sacks or globules,  
and requires the action of air to prepare the cover-  
ing or membrane to be removed by friction.

*The Scientific American says:*

"If cream is dashed against hard substances or  
mashed between bars or rollers, it breaks the glob-  
ules, and becomes oily by destroying the grain.—  
It should be thrown into currents and counter-cur-  
rents by the action of air, causing a friction, by the  
currents against each other, removing the covering  
without breaking or bursting the globules."

The inventor of this Dash endeavored to keep  
this theory in view, and hence the remunerative  
results. We can churn new milk or cream in from  
three to ten minutes, producing a larger quantity,  
and a superior quality, to that made in, or by any  
other method. One grand feature of this Dash is;  
that it can be introduced into any kind of churn,  
thereby saving additional expense in buying an-  
other.

The result is as certain as that grass grows and  
Butter is made. Wherever it has been exhibited,  
at Agricultural Fairs, it has taken the first premi-  
um.

For sale by PETER H. MARTIN,  
Irvine Hall, Ellicottville.

## Craig's Microscope

Is the simplest, most beautiful, interesting and use-  
ful Instrument ever made.

It MAGNIFIES ONE HUNDRED DIAMETERS, OR  
10,000 Times!

Viewed in this Microscope, a common *cheesewheel*  
assumes gigantic proportions; animalcules in stag-  
nant water are distinctly visible; the curious con-  
struction of insects, in their various parts, is inti-  
mately observable; all granular substances, such as  
floor coffee, &c., can be tested, and adulteration  
therein detected. As a means of education and  
amusement, it is invaluable. It is the first success-  
ful attempt to cheapen and popularize the micros-  
cope. Every lover of nature, student, scientific  
and business man should own one. Its price, Two  
DOLLARS, places it within every one's reach. All  
the Dealers and Agents who have undertaken it  
sale have prepared Testimonial, description &c  
in ILLUSTRATED CIRCULARS are sent, free  
on application.

DEALERS SHOULD SEND FOR EXTRA PRIVATE CIRC-  
ULAR TO THE TRADE.

Price, free by mail \$2.25; with six mounted ob-  
jects \$3; with 24 objects \$5. Objects mounte  
for the microscope, \$1.50 per dozen.

Dealers should order from GEO. BOWEN & CO.  
P. O. Box 4555, 491 Broadway, New York City

Retail orders from the neighborhood of Ellicott  
ville will be attended by E. S. STEWART.

on the walk, but not be ascertain.

...to make his car #31 street. No was discovered, that "grabbed" him, and he stripped his uniform almost to his neck some twenty feet north; not content thrown at him as he buried.

JOHNSTON is reorganizing the militia and will use his accustomed energy to bring order out of chaos. It is an excellent appointment.

The exhibition and trial of Mowing Machines, as advertised by the "Cattaraugus County Agricultural Society," to take place on Tuesday last, was rather a slim exhibition—only two Machines being on the ground.

IMPROVEMENT OF THE ALLEGANY RIVER. An appropriation of \$5000 was made last winter for the survey of the Allegany River, from the junction with the Genesee V. Canal, to the mouth of Great Valley Creek, and the State Engineer is about to enter upon the work.

LAURENCE.—We learn by the Arcade Enterprise that the American Hotel, at Yorkshire Corners, owned by R. B. Thorton, was struck by lightning on Monday of last week, damaging it to the amount of about \$200. No person injured.

COL. JONES.—This gallant young officer, commander of the 15th Regiment, who was wounded and taken prisoner at the Battle of Chancellorsville, is in town, on a visit. His wound is nearly healed, and he hopes soon to be exchanged, so that he can return to his regiment. We are authorized by him to say that the statement of the Olean Advertiser that he was about to resign, is entirely without foundation. Good for the Colonel!

ELY S. PARKER, THE INDIAN CHIEF, ON A GENERAL'S STAFF.—Ely S. Parker, who formerly read law in this Village, and is head Sachem, of the Seneca Indians, has accepted the position of assistant adjutant General on the staff of Gen. Smith, now at Vicksburg. His departure was made the occasion of a meeting of the Nation at the Council House on the Tonawanda Reservation to bid him adieu. Mr. Parker is an accomplished civil engineer, and has been several times employed by the government in that capacity.

THE HENNARD JR. MOWING MACHINE. One of the Machines put in operation at the Mowing exhibition in this Village on Tuesday was the HENNARD JR. It is by far the best Machine ever brought into the County, and it does its work smooth and easy and is not liable to get out of repair.

Those who want one of these Machines should apply to Jay Gano of Little Valley, who is the Agent for this County, and who will supply them promptly. Get one by all means, for it is really a labor saving Machine, when hands are to be so scarce about these draughting days.

Butter is made. It has taken the first premium at Agricultural Fairs.

For sale by PETER H. MARTIN, Irvine Hall, Ellicottville, N. B. Counties and Territorial rights for sale. Craig's Microscope Is the simplest, most beautiful, interesting and useful Instrument ever made.

It MAGNIFIES ONE HUNDRED DIAMETERS, OR 10,000 TIMES! Viewed in this Microscope, a common drop of water assumes gigantic proportions; animalcules in stagnant water are distinctly visible; the curious construction of insects, in their various parts, is intimately observable; all granular substances, such as flour coffee, &c., can be tested, and adulterations therein detected.
